Yes, thanks Brett. Please proceed with tomorrow's oversight and see when CRA will sample the remaining 3 priority wells (all on-site wells). I would like CH2M to plan to oversee all on-site well sampling - even if we are over task budget. And let's plan to skip oversight of all DPL well sampling for now - the new DPL wells and existing DPL wells. That will save us some LOE.

Thanks, Karen.

Hi Karen, Per our discussion this morning, I had ... 01/04/2010 12:28:17 PM

Subject: FW: South Dayton Dump Monitoring Well sampling

Hi Karen,

Per our discussion this morning, I had Osaguona write a status on the groundwater monitoring that CRA is conducting. You originally recommended that we observe onsite well sampling only, and you prioritized 11 wells in particular. Five of those 11 wells were sampled in December, and 3 of the remaining wells are to be sampled tomorrow. We do not know when the other 3 remaining priority wells are scheduled.

We currently have less than 20 hours of LOE remaining on the field oversight task, but are obviously well below the overall Work Authorization LOE budget for the project. Osaguona estimates below another 2 days to get the priority wells done, which includes tomorrow. That would be about 20 hours, assuming they sample the remaining 3 priority wells consecutively.

Do you want us to proceed with tomorrow's oversight, and try to get a schedule from CRA on the remaining 3 priority wells?

**Subject:** South Dayton Dump Monitoring Well sampling

Brett,

In an email sent on December 7, Karen directed that we observe groundwater sampling activities in 11 monitoring wells. The monitoring wells she directed us to observe include the following; MW-209A, MW-210A/B, MW-215A/B, MW-216 MW-217 and MW-219 (the well or piezometer up near VAS-04), MW-218A/B and MW-214 (wells by south end of Quarry Pond). During the December mobilization to the site, CRA sampled five (MW-210A/B, MW-214 and MW-218A/B) of the 11 wells that Karen indicated that observe sampling. According to CRA field schedule, they will be sampling additional three (MW-215A/B and MW-209A) of the monitoring wells tomorrow (Tuesday). CRA has not indicated when they will be sampling the remaining three (MW-216, MW-217 and MW-219) monitoring wells, we are coordinating with CRA to know when they will be sampling these three wells so we can be onsite to observe activities during the monitoring wells sampling.

At the rate CRA is sampling, I estimate that they will require two days (including tomorrow) to complete the well Karen wants us to seen sampled.

Please let me know if you have any questions.

Thanks

Osaguona Ogbebor/DAY
